Email Setup for Android Devices:

These steps will show how to setup your EKU student email account on an Android device. There are a wide variety of Android devices made by different manufacturers and running different versions and modifications of the Android software. Some of the screens may differ slightly from the instructions below, depending on the version of the software and the manufacturer of the device.

Before you begin, make sure you know your EKU myMail username and password!

Go into settings on your device and tap Accounts & Sync:
Tap **Add Account**:  

Type in your email address and your myMail password and tap **Next**:
Change the Domain/Username field to show your full email address, change the server to **pod51004.outlook.com**, check Accept All SSL Certificates, Use Secure Connection (SSL), and press **Next**:

Confirm your settings and tap **Next**:
Enter a description for your account and type in your name, then tap **Done**.
